PROSPERITY IS NEAR AT HAND PRESENT TIME

Many Districts of Southern Nevada Are Showing Much Activity in Mining Way

HEAVY PRODUCTION FOLLOWS PREDICTION IS FREELY MADE THAT SOUTHERN NEVADA WILL SOON LEAD THE WORLD

Conditions throughout southern Nevada continue to show a marked improvement in a general way, and especially is this true concerning the Tonopah and Divide districts. Large developments continue in force on the larger mines and the production is being maintained at a high standard of efficiency, with the outlook bright for even a heavier tonnage of ore being extracted with the passing weeks.

As an augury of what is being accomplished one need only follow the stock market to be convinced that the old standbys of Tonopah are holding their own and that instead of the ore reserves becoming depleted, as a matter of fact new and larger and richer bodies of ore are being uncovered than ever realized during the early days of the camp. The Tonopah Extension, which has the deepest workings to be found in any mine in southern Nevada, will proceed within the near future to develop a new body of ore from a production standpoint that will startle the mining world, and at the same time prove an incentive for other companies and owners of properties in the district with deeper exploitation.

The Tonopah Belmont Development company is also prosecuting deep mining in a number of places and the main shaft has a depth of 1500 feet. Exploitation of territory on this level is now in order and satisfactory results are reported. Tonopah Mining is confining its efforts largely to working out the known ore bodies in the old workings and the present production is being maintained, while West End Consolidated is breaking a heavy tonnage from both the Ohio and West End shafts, with a portion of the production coming from the Halifax mine, which is being operated under lease. The Midway, Rescue-Eula, Tonopah North Star, MacNamara and MacNamara-Crescent are carrying forward development and shipments are going out at irregular intervals, with every prospect that the output will be augmented from time to time. Shipping substantial tonnages of ore and a good production is in order.

The Divide district is showing signs of renewed life. In addition to the work going forward on the Tonopah Divide and which is being followed by substantial tonnage of excellent grade ore which is being treated at the Tonopah Belmont mill, shipments are going forth at intervals from the Divide Extension, Gold Zone and New Tonopah Dividend, while work is being prosecuted on the Alto and Kernick, with the announcement just made that large development is to follow immediately upon the Gold Belt which is regarded as making a most wonderful showing from near surface development.

One of the outstanding features of outside mining during the past couple of weeks has been the showing that is taking place on the property of the New Gibraltar Silver Mining company, which is controlled by Harry C. Stimler and associates. In the lower tunnel a body of ore having a width of nearly 20 feet is exposed that is 55 feet in length, with average values of over \$30 a ton, yet neither the hanging nor foot wall is in evidence. Engineers estimate that this vein will be found to have a width of from 100 to 150 feet with increased depth, and to that end eastern financiers have agreed to furnish the money needed to carry forth a thorough campaign of mine development, and which will no doubt be followed by the construction of a large and modern milling plant.

Argentite will probably develop into the first real mining camp of prominence. This by reason of the fact that three promising mines have already been developed in the Francis, Mohawk and Inman. Small shipments have been made of late weeks, but no effort at heavy production has been made. However, in view of the fact that the ore grows richer as depth is attained, with a correspond-

RELMONT MAKES GREAT HEADWAY WITH MILLING

Production for First Half of September Amounted To \$94,000

Operations Being Prosecuted on Six Different Levels, With Most Pleasing Results

The Tonopah Belmont Development company continues to maintain its lead as a shipper of bullion, and the present week witnessed 40 bars, weighing \$2,000 ounces and having a value of \$94,000, being consigned to San Francisco. The earnings from this famous producer is being kept well up to the standard, and the production for the last half of August and the first half of September totaled \$216,230. This average, if maintained for a year, would make a production of \$2,595,480.

Development in the mine workings is being prosecuted through six levels and a splendid showing is reported as being in evidence. The official report of operations for the seven-day period ending Thursday, Sept. 21, follows:

800 level—Intermediate east drift off of raise 550 has been following a zone and a half of ore. Intermediate south crosscut has been started off at intermediate east drift off of raise 520. Intermediate south-west crosscut is being driven off of slope 8043 to connect with raise 65 for the purpose of developing and mining ore found in raise 65. Raise 65 is being driven on a streak of quartz.

900 level—West drift 3065 is being advanced on a four and a half of ore. Intermediate east drift and intermediate west drift have been started off the intermediate south crosscut off of slope 219 on a streak of quartz showing some values.

1000 level—East drift 10084 and west drift 10085 have been started on quartz found in north crosscut 10055. Northeast crosscut 10081 has been stopped and raise 129 has been started to prospect for a segment of the Mizpah fault vein. Southeast crosscut 10025 is being extended in trachyte.

1100 level—An intermediate south crosscut has been started off of raise 131 to prospect for the downward extension of ore mined on the level above. Raise 131 is being driven to connect with the 1000 level. Raise 1136 has been started off of southeast crosscut 11021 for the purpose of ventilation.

1200 level—Intermediate northwest crosscut off of east slope 5 is being extended in the footwall of the Belmont vein. Raise 43 has been started off of the intermediate west drift for the purpose of mining ore below the footwall branch of the Belmont.

1300 level—Southwest crosscut 1309 is being extended for the purpose of prospecting.

METROPOLITAN PLAYERS PLEASE LARGE AUDIENCE

Last night another crowded tent greeted the Metropolitan Players in their second performance in their tent theater. The play was "Believe Me, Santippe," and was well presented by a capable cast and was full of good, clean comedy. Tonight's offering is another Toby play, "The Maid of the Mountains." Many laughs are promised tonight. Sunday night one of their feature plays will be presented, Maud Fulton's great success, "The Brat."

ing increase in the size of the ore bodies. It would seem that by early next spring there will be a flourishing mining camp in full bloom.

Royston, the camp that created quite a little sensation a year ago by reason of the rich material finds made near surface, is not a deserted district by any means, but on the other hand, development is going steadily forward with highly pleasing results on the Hudson and Golden Eagle properties and a substantial tonnage of ore is being mined in both workings. The Walker brothers, Salt Lake bankers, who are interested in the Hudson Mining company, visited the scene of activities during the past week, and it is reported that funds are to be provided for the thorough exploitation of the vast acreage of mineral ground that is controlled.

Other districts are showing more or less activity, and in view of the fact that the tariff bill has become a law with clauses inserted that will prove beneficial to the mining industry in general, there is a reason for believing that a wonderful era of prosperity is near at hand for southern Nevada.

The Bonanza publishes the news the day it happens. No rehearsal in the telegraphic dispatches. Only a dollar month, delivered at your door.

MILLS OPERATE STEADILY WITH GOOD RESULTS

Output From District for First Half of Month Is Well Up to Standard

Shipments of bullion for the first half of September from the four mills of the Tonopah district which were sent out during the week just drawn to a close showed a total production of \$274,585. This was a slight decrease over the preceding 15 days, but was occasioned largely as a result of the West End Consolidated terminating its contract with the MacNamara Mining and Milling company for the treatment of the overflow of ore and also by the fact that operations at the Tonopah Extension have been somewhat curtailed as a result of installation of the powerful pumping equipment at the McKane shaft. However, part of the deficiency was made up through a shipment of bullion from the White Caps mill at Manhattan amounting to \$15,000, which swelled the output to \$289,585. The production was credited as follows to the five mills:

Mill	Production
Belmont	\$ 94,300
West End	64,285
Tonopah Extension	56,000
Tonopah Mining	60,000
White Caps	15,000
Total	\$289,585

PERSONAL

H. S. REAVIS and son of Reno are visitors to Tonopah.

J. W. BERGIN, Round Mountain mining man, is a visitor to Tonopah.

MATT KANE, Manhattan mining man, is a visitor to Tonopah on business.

IRA MURDOCK, well-known cattleman of Spotted, was a business visitor to Tonopah this morning.

O. H. SMITH, chief of police, has returned from Carson City, where he appeared as a witness before the federal grand jury.

JAMES WOODS, Smokey valley rancher and cattleman, has returned home after a visit of a few days in Tonopah.

MRS. J. G. CRUMLEY left yesterday for Reno, where she joined her husband, who has been looking after business matters in that city.

CARL H. SEALS, major in the U. S. army, spent last night in Tonopah, being a guest at the Mizpah hotel.

GIBSON BERRY, superintendent of the Round Mountain and Fairview Mining companies at Round Mountain, was an arrival in Tonopah last night to look after business interests.

DR. HELEN R. RULISON, who has been on the coast for some time, accompanied by her husband and sister-in-law, Miss Clara Shipley, the latter of Baltimore, Md., arrived in Tonopah yesterday by auto.

HOMER O'CONNELL, formerly a shift boss at the Tonopah Belmont, accompanied by his wife, arrived from Reno yesterday and will continue to Los Angeles to spend the winter.

STAGE-DOOR JOHNNIE WAS PLAIN JACKASS

Yesterday morning when the comedy team of Murray & Murray of the Butler theater were rehearsing their act, a new character entered the cast in the person of the deep-dyed villain, who stole the pretty white dancing slippers of the comedienne. No melodramatic villain could have been more cruel, and to those who witnessed the act no cleaner comedy could have been suggested, but to pretty little Mrs. Murray it was a tragedy which required her to go tripping down the main street in her stocking feet to buy a new pair of slippers.

There are those who belong to the purity league who have objected to face powders and rouge, while others of us rather like the looks of it, the smell of it, and even the taste of it, and it is not to be wondered that the villain who made his unannounced back stage entrance should have been attracted there by looks, and the smell and the taste of the tempting morsel covered with white powder set out to dry.

It seems that Mrs. Murray having danced all the white polish off her pumps, took some of that liquid preparation, similar to that which we have often been called upon to explain its presence upon our coat lapels, and coated her white pumps with liquid lady dust and set them out back of the stage to dry. Here the villain, a gray burro, spied the tempting morsel and devoured the slippers for his lunch, with the result that the comedienne was obliged to trip stocken-footed down the street and procure a new pair.

We know now why the stage door Johnnies wait for the stage beauties. We'll admit, however, that we would not blame any villain for stealing the owner, but he certainly was a jackass to be satisfied with merely the slippers.

AMUSEMENTS

BIG FIGHT BUTLER TREATS

You all remember witnessing and enjoying round one of "The Leather Pushers" at the Butler a few weeks ago. Today round two will be staged. Reginald Denny plays Kane Halliday, famous hero of a famous series of stories, and Denny is Kane Halliday, alias "Kid" Roberts, heavyweight boxer, society man and son of his illustrious father. The most delightful wedding together of the ring and the social whirl ever filmed, in the humorous and delightful style of H. C. Witwer stories as they appeared in Colliers—which millions of you have read.

The other picture, a five-reel feature, on today's bill is William Duncan, with Edith Johnson, in "The Silent Vow." It is a stirring story of the great Canadian northwest adapted from a highly successful novel. The picture is filled with thrills, one of which shows three men struggling toward a great waterfall over which they plunge.

Tomorrow: Viola Dana, in "They Like 'Em Rough," and the fourth chapter of "Robinson Crusoe."

Monday: Priscilla Dean in her latest big picture.

BELMONT EMPLOYE IS THE LATEST BENEDICT

Joseph J. Hannes, Tonopah Belmont shift boss, was united in marriage last evening to Miss Rachael Smalley. The ceremony was performed by Justice Cuddy, the couple being attended by Robert Reid and Miss Olive Overman, and Robert Weems, foster father of the bride, was here from Mount Montgomer. Following a wedding supper the newlyweds repaired to a home on Bryan avenue and Summit street, which had previously been prepared by the groom.

CLASSIFIED ADS

FOR RENT

FOR RENT—Modern three-room furnished house; good neighborhood. Phone 1675.

LOST

LOST—Two keys on ring. Return to Bonanza. Reward.

FOUND

FOUND—A bunch of keys. Apply Bonanza office.

FOUND—Lady's coat, on Divide road. Identify same, pay for this ad and take it away.

FOR SALE

FOR SALE—Used Remington type writer, \$40. See Mr. Walmsley, Mizpah hotel.

FOR SALE—Doors and windows, reduced rates. Apply to Mizpah hotel building.

FOR SALE—Kernick bunk houses, 16x20; Revert boarding house, 20x80; studded buildings, good floors. See Iven Jeffries, Harbrough office.

WANTED

WANTED—Boy not going to school. Apply Mizpah Hotel.

LADY wishes auto passage to Los Angeles. Phone 1937. \$22-3.

WANTED—All-around blacksmith for mine in Nevada; machine sharpening of drill steel and good tempering required; wages \$5; married man preferred. Give references in places worked, when replying. Address Box 88, care Bonanza. \$22
